

Manufacturer Nord West	Offer Type Used Boat	year 1999	Condition in need of repair	
Overall Length 12.20 m	Beam 3.80 m	Draft 1.10 m	Displacement 10000 kg	Hull Type Planing
Material GRP	Hull Color white			
Engine Volvo Penta TAMD64P	Engine Power 2 x 370 PS / 272 kW	Engine Type Sterndrive	Fuel Type Diesel	Fuel Capacity 1000 l
Engine Year 1999	Hours 977 h			
CE Design Category B - Offshore				
Number of Cabins 2	Number of Berths 6	Number of toilets 1	Showers 1	

Equipment

Stove, Oven, Sink, Fridge, Compass, Autopilot, VHF Radio, Radar, Chartplotter, Depth Instrument, Speed Instrument, Shore Connection, Battery, Battery Charger, Navigation Lights, Anchor, Bow Thruster, Stern Thruster, Trim Tabs, Bow Anchor Capstan, Stern Anchor Capstan, Bilge Pump, Fire Extinguisher, Heating, Water Pressure System, Warm Water System, TV, Radio, Bathing platform fix, Swim Ladder, Cockpit Table, Teak Cockpit, Teak Deck, Deck Shower, Cockpit Cover, Flybridge Cover, Underwater Paint, Dinghy, Kaleche, Pots and pans

Description

PROJECT BOAT - FANTASTIC FURNISHINGS - ATTRACTIVE PRICE

Swedish Nord West is a true love affair at sea. The yard has always managed to make boats with lots of identity and charm, and with use there is a lot of wood in the accommodation and beautiful craftsmanship, the maritime coziness is turned up. This is also the case with Nord West 410.

This boat needs restoration and attention, including: woodwork inside and out - leaking water tank - defective generator - worn canvas externally - possible leaks from windows (it may only be condensation damaged) - polishing and waxing. A cleaning company has just been hired to clean all the exterior teak wood as well as cleaning the interior.

The boat is being sold due to illness.

INSIDE:

The boat is a super nice interior, where you can sleep 4 people on board divided into the aft cabin and the Owners Cabin in the foredeck, both with a double bed. Entrance to the salon is from the stern through sliding doors. Sofa arrangement in BB side with table and opposite chest of drawers with storage, which also functions as a TV table. Helm station located in STB side. Descent from salon by stairs to fine U-pantry. Access to bathroom with separate shower section from distribution corridor

EXTERIOR:

Through the sliding door from the saloon, access to the large aft deck, which can be closed off with a canopy. From the aft deck you have stairs to the boat's flybridge, from which the boat can also be steered. From the aft deck access to the bathing platform nicely covered with teak.

ENGINE:

The boat is equipped with 2 pcs. Volvo Penta TAMD 63P, which produces a total of 740 HP. To make port maneuvering even easier, bow and stern thrusters have been installed.

The tender price takes into account the fact that the boat needs repairs. If you have your hands full and can see the possibilities in this project, book an appointment for a viewing with boat broker Tobias Schmidt Larsen from BOATERY on tel. +45 7730 0677 or email info@boatery.dk

Disclaimer: BOATERY is not responsible for any errors in description and specification. Information about this has been received from the boat's owner. Reservations are also made for printing errors.
